

FEATURES

- The latest addition to the line of Elite accessories for indoor cycling is the **Gateway Wired Ethernet Dongle**, the device that allows you to **connect the trainer directly to your router** with a wired connection.
- The **Elite Gateway** works hand in hand with the **Justo 2**, **Justo** and **Avanti** trainer to ensure a **more secure connection** without interference or data loss even in the most disturbed environments, and is especially useful for online competitions.

A STABLE CONNECTION FOR YOUR ONLINE RACES

- With **Elite Gateway**, you can compete online on your favorite cycling apps at all times **without worrying about glitches or interference** during the race
- To do this, simply connect the **Gateway** to your trainer through the appropriate port, connect your ethernet cable to the device on one end and to your router on the other end. Now, race in real time on your favorite apps or software with a **stable and secure connection**.
- The ethernet cable is not included with the purchase of this device.

AUTOMATIC CONFIGURATION

- The **Elite Gateway** can autonomously **self-configure** requiring no action from the user.

DETAILS

- Compatible trainers: Justo, Justo 2 and Avanti.
- Ethernet cable not included.
- We recommend the use of shielded Ethernet cable, CAT 5 or higher.
